

- Scissors icon (for incision)
- Bandage icon (for aftercare)
- Heart icon (for cardiovascular)
- Brain icon (for neurological)
- Stomach icon (for digestive)
- Bone icon (for musculoskeletal)

Educational Icons

- Book icon (for modules)
- Graduation cap icon (for assessments)
- Pen icon (for workbooks)
- Lightbulb icon (for insights)
- Chart icon (for data)
- Certificate icon (for credentials)

Spiritual Icons

- Mosque/dome icon (for Islamic context)
- Crescent icon (for lunar/timing references)
- Star icon (for excellence/quality)
- Hands icon (for dua/supplication)
- Olive branch icon (for healing/nature)
- Date palm icon (for Prophetic tradition)

10.4 Imagery Style

Photography

- **Tone:** Warm, natural light, soft shadows
- **Color palette:** Earth tones, muted greens, warm ambers, cream backgrounds
- **Subject matter:** Hands performing hijama (always with gloves, always respectful), natural ingredients (honey, dates, olive oil), clinical environments (clean, professional, warm), students in learning environments
- **Treatment:** Slight desaturation (10–15%), warm color grading, soft focus backgrounds
- **Never:** Graphic medical imagery, blood shown in detail, unprofessional settings, stock-photo artificiality

Illustration

- **Style:** Line art with minimal fill, medical-illustration precision
- **Color:** Deep Gold lines on white or Cream backgrounds; or Primary Black lines
- **Line weight:** 0.75pt for primary anatomy, 0.5pt for secondary details, 1pt for emphasis
- **Shading:** Minimal — use line density or single-tone fill at 10% opacity
- **Labels:** Inter 8pt, Deep Gold, with 0.5pt leader lines

Diagrams

- **Style:** Clean, technical, precise
- **Color coding:** Deep Gold for Sunnah points, Slate for anatomy, Primary Black for procedure steps
- **Annotations:** Inter 10pt, with clear leader lines
- **Scale:** Always include scale bar or reference measurement
- **Legend:** Required for all diagrams with more than 3 labeled elements

10.5 Data Visualization

Chart Style

- **Bar charts:** Vertical bars, 8pt width, 4pt spacing, Deep Gold fill, no stroke
- **Line charts:** 1.5pt line, Deep Gold, with 4pt circle markers
- **Pie charts:** Minimal segments, Deep Gold primary, Slate secondary, Cream tertiary
- **Tables:** See Clinical Pages specifications
- **Color coding for data:**
 - Primary/Sunnah: Deep Gold
 - Secondary/Related: Slate
 - Tertiary/Contextual: Cream
 - Alert/Warning: Muted red (only for medical contraindications)
 - Success/Positive: Deep Gold (never green — maintain brand consistency)

Infographic Rules

- Maximum 3 data points per visual
- Each data point must have a clear label
- Use white space to separate data stories
- Never use 3D effects, gradients, or shadows on charts
- All numbers in Inter SemiBold, 18pt, Deep Gold
- All labels in Inter Regular, 10pt, Charcoal

11. VISUAL HIERARCHY

11.1 The Hierarchy of Attention

Visual hierarchy is not about shouting. It is about **guiding the eye with grace**. The Sunnah Remedies Academy hierarchy follows the natural reading pattern: top-left to bottom-right (for LTR), with intentional deviations for emphasis.

11.2 The Five Levels of Hierarchy

Level	Name	Visual Weight	Purpose	Example
L1	Divine	Maximum	The most important element on the page —usually the title or primary message	Module title, certificate name

Table 1 – continued

Level	Name	Visual Weight	Purpose	Example
L2	Sacred	High	Supporting primary message —subtitles, chapter names	Chapter headings, section titles
L3	Scholarly	Medium	Content structure — subsections, key terms, labels	Subsection headers, table headers
L4	Knowledgeable	Standard	Body content —the substance of learning	Body text, lists, descriptions
L5	Whisper	Minimal	Metadata, captions, footnotes, page numbers	Footnotes, captions, dates, numbers

11.3 Hierarchy Tools

Size

- **L1:** 45–72pt (Cormorant Garamond)
- **L2:** 22–36pt (Cormorant Garamond)
- **L3:** 14–18pt (Cormorant Garamond or Inter)
- **L4:** 12–14pt (Inter)
- **L5:** 10–12pt (Inter)

Weight

- **L1:** Light or Regular (elegance through restraint)
- **L2:** Regular or Medium
- **L3:** Medium or SemiBold
- **L4:** Regular
- **L5:** Regular or Light

Color

- **L1:** Primary Black or Deep Gold
- **L2:** Primary Black
- **L3:** Primary Black or Charcoal
- **L4:** Charcoal
- **L5:** Slate

Position

- **L1:** Top third of page, centered or left-aligned
- **L2:** Upper half, left-aligned or centered
- **L3:** Inline with content, left-aligned
- **L4:** Main content area
- **L5:** Margins, bottom, or secondary positions

Space

- **L1:** Surrounded by maximum white space (minimum 24pt on all sides)
- **L2:** Surrounded by generous white space (minimum 18pt)
- **L3:** Standard spacing (12pt above, 6pt below)
- **L4:** Compact spacing (12pt between paragraphs)
- **L5:** Minimal spacing (6pt from related content)

11.4 The Hierarchy Test

Before finalizing any page, apply the **Squint Test**:

1. Squint at the page so it becomes blurry
2. Identify what you see first, second, third
3. If the order does not match the intended hierarchy, redesign
4. The first thing seen should be the L1 element
5. The last thing seen should be the L5 element

11.5 Hierarchy Exceptions

Pull Quotes: Functionally L4 content but visually treated as L2 (size, color, space) to create rhythm and emphasis.

Callout Boxes: Functionally L4 content but visually elevated through background color (Cream at 20% opacity) and border (1pt Deep Gold left) to draw attention without disrupting flow.

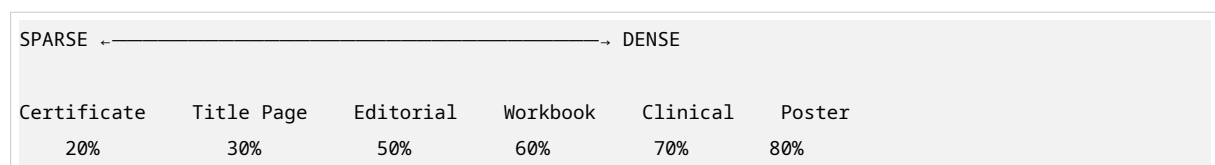

Alerts/Warnings: Functionally L4 content but visually emphasized through background (Cream at 30% opacity) and border (1pt Deep Gold) to signal importance.

12. INFORMATION DENSITY

12.1 The Density Philosophy

Information density must be **appropriate to the context**. A certificate should feel sparse and precious. A clinical reference should feel comprehensive and accessible. The designer's job is to match density to purpose.

12.2 Density Spectrum

12.3 Density by Page Type

Page Type	Target Density	Maximum Density	Strategy
Certificate	20%	30%	One message, one name, one credential. Everything else is ornament.
Title Page	30%	40%	Title, subtitle, minimal metadata. Vast white space.
Module Cover	40%	50%	Number, title, objectives, logo. Generous margins.
Editorial Page	50%	65%	Body text with breathing room. Pull quotes for rhythm.
Workbook Page	60%	70%	Instructions + activity space. White space for student work.
Assessment Page	65%	75%	Questions with clear spacing. No ambiguity.
Clinical Page	70%	80%	Data, diagrams, tables. Organized but dense.
Poster Page	75%	85%	Maximum information for quick reference. Grid-based.

12.4 Managing Density

When Density Is Too High

1. **Break content across pages** — never cram
2. **Use a sidebar** — move secondary information to the margin
3. **Create a reference table** — move data out of prose
4. **Use accordions or tabs** — for digital, hide secondary content
5. **Increase white space** — reduce content by 20% and increase spacing by 20%

When Density Is Too Low

1. **Add pull quotes** — break up long text with visual interest
2. **Use two-column layout** — fill space without adding content
3. **Add diagrams or illustrations** — visual explanations increase density meaningfully
4. **Increase type size** — larger text fills space without feeling empty

5. **Add ornamental elements** — geometric patterns, borders, or motifs

12.5 The Density Rule

“Every page should feel like it contains exactly the right amount of information — neither a wasteland nor a landfill.”

13. PRESENTATION RHYTHM

13.1 The Rhythm of Learning

A Sunnah Remedies Academy document is not a collection of pages. It is a **journey**. The presentation rhythm controls the pace of that journey — when to accelerate, when to pause, when to reflect, when to act.

13.2 The Page Rhythm Map

Module Cover	→	REST	(slow, contemplative, inviting)
↓			
Title Page	→	REST	(preparation, anticipation)
↓			
Editorial Pages (3-5)	→	FLOW	(steady reading, knowledge absorption)
↓			
Pull Quote Page	→	PAUSE	(reflection, emphasis, breath)
↓			
Clinical Pages (2-4)	→	FOCUS	(intense, detailed, precise)
↓			
Diagram/Chart Page	→	PAUSE	(visual processing, spatial learning)
↓			
Workbook Pages (2-3)	→	ENGAGE	(active participation, application)
↓			
Assessment Page	→	TEST	(formal, evaluative, structured)
↓			
Module Cover (next)	→	REST	(cycle begins again)

13.3 Rhythm Techniques

The Rest Page

- Low information density (20–40%)
- Generous white space (50%+)
- Centered or top-weighted composition
- Minimal color (Cream, White, Deep Gold accents only)
- Purpose: Allow the learner to mentally prepare and reset

The Flow Page

- Medium information density (40–60%)
- Consistent spacing and rhythm
- Single-column or comfortable two-column layout
- Purpose: Sustained reading and knowledge absorption

The Pause Page

- Variable density (30–50%)
- Breaks in pattern — pull quote, full-bleed image, diagram
- Different layout from surrounding pages
- Purpose: Create emphasis, allow reflection, mark transition

The Focus Page

- High information density (60–80%)
- Tight spacing, structured grids, data-heavy
- Clinical precision, minimal ornament
- Purpose: Deep engagement with complex information

The Engage Page

- Medium density (50–70%) but with active white space
- Workbook exercises, fill-in areas, reflection prompts
- Purpose: Transform passive reading into active learning

The Test Page

- High density (65–75%) with formal structure
- Clear sections, numbered items, unambiguous instructions
- Purpose: Evaluate and certify understanding

13.4 Rhythm Rules

1. **Never place two Rest pages adjacent.** Rest must be earned by Flow.
2. **Never place three Focus pages in a row.** Break with a Pause page.
3. **Always follow Focus with Pause.** The mind needs recovery after intense information.
4. **Engage pages should follow Flow pages.** Application must come after absorption.
5. **Test pages should follow Engage pages.** Evaluation must come after practice.
6. **Vary page layouts every 2–4 pages.** Predictability creates boredom; variation creates engagement.

13.5 The Page Turn Effect

Design for the **physical act of turning the page**:

- **Surprise:** Place an unexpected full-bleed image on the right-hand page after a text-heavy spread
- **Reward:** End a difficult clinical section with a beautiful diagram
- **Tease:** Place a compelling pull quote at the bottom of a left-hand page to draw the reader forward
- **Rest:** Place a title page after a dense assessment to signal completion

14. CONSISTENCY RULES

14.1 The Non-Negotiables

These rules are absolute. No deviation is permitted without written approval from the Academy Design Director.

Rule 1: Grid Adherence

- All elements must align to the 12-column master grid
- No arbitrary placement
- No floating text boxes
- No misaligned columns

Rule 2: Type Discipline

- Cormorant Garamond for headings and display text only
- Inter for body text, UI, and data only
- Amiri for all Arabic script only
- No other typefaces permitted
- No typeface substitution under any circumstances

Rule 3: Color Fidelity

- Use only the approved brand palette
- No custom colors, no gradients, no tints beyond specified opacities
- Deep Gold must never appear on dark backgrounds without 4.5:1 contrast ratio
- Primary Black must never be used for large areas (causes visual fatigue)

Rule 4: Spacing Consistency

- Use only the Sacred Scale spacing tokens
- No arbitrary spacing values
- No eyeballing — measure everything
- Maintain baseline grid alignment for all text

Rule 5: Margin Respect

- No element may touch the page edge
- Maintain minimum margins for each page type
- Respect binding allowances in printed materials

Rule 6: White Space Minimum

- No page may have less than 10% white space
- Target white space ratios must be observed
- White space is not a bug — it is a feature

Rule 7: Hierarchy Clarity

- Every page must have a clear L1 element
- No competing L1 elements on the same page
- Hierarchy must pass the Squint Test

Rule 8: Arabic Integrity

- All Arabic text must use Amiri
- All Arabic text must be right-to-left
- All Quranic citations must include full tashkeel

- All transliteration must follow ALA-LC standard

Rule 9: Clinical Accuracy

- All anatomical diagrams must be medically accurate
- All procedure steps must be reviewed by a certified practitioner
- All contraindications must be current and evidence-based
- All data must be sourced and cited

Rule 10: Sacred Respect

- No imagery that contradicts Islamic principles
- No text that trivializes Prophetic medicine
- No design that feels frivolous or trendy
- Every element must feel worthy of the knowledge it carries

14.2 The Permitted Variations

Within the system, these variations are allowed and encouraged:

Element	Permitted Variations
Background color	White, Cream, or Charcoal (reversed)
Column layout	Any of the 8 approved configurations
Divider type	Any of the 6 approved types
Page type	Any of the 8 specified page types
Information density	Within the specified range for each page type
Image treatment	Full bleed, framed, or inline
Ornament placement	Top, bottom, or corner (never interfering with text)

14.3 The Prohibited List

These are never permitted in any Sunnah Remedies Academy document:

- ❌ Drop shadows on text or boxes
- ❌ Gradient fills (except subtle paper texture overlays)
- ❌ 3D effects, bevels, or embossing (except physical certificates)
- ❌ Neon or fluorescent colors
- ❌ Comic Sans, Papyrus, or any display/script fonts
- ❌ Clip art or stock illustrations
- ❌ Watermarks behind text
- ❌ Clipart-style icons
- ❌ Animated GIFs (in digital documents)
- ❌ Auto-play audio or video
- ❌ Pop-ups or interstitial ads
- ❌ Unsourced medical claims
- ❌ Graphic or disturbing medical imagery
- ❌ Cultural appropriation or misrepresentation
- ❌ Trendy design fads (skeuomorphism, flat design excess, brutalism, etc.)

14.4 Version Control

All Academy documents must include:

- **Version number** (e.g., V.2.3)
- **Date of creation**
- **Date of last review**
- **Document owner** (department or individual)
- **Approval status** (Draft, Review, Approved, Archived)

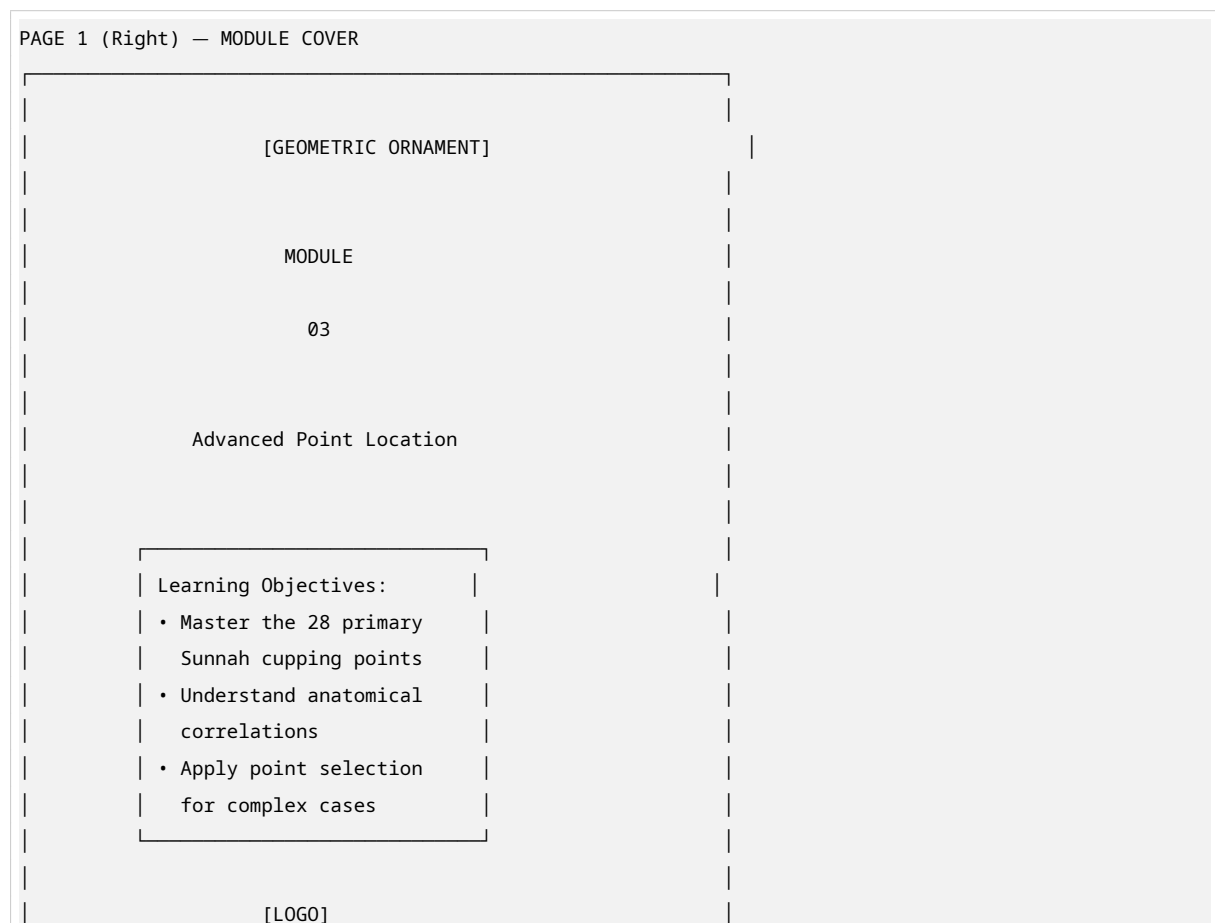

This information appears in the document footer or on the credits page, in Inter Regular, 8pt, Slate.

14.5 The Review Cycle

- **New documents:** Must be reviewed by Design Director before publication
- **Existing documents:** Reviewed every 6 months for accuracy and brand compliance
- **Clinical content:** Reviewed annually by Medical Advisory Board
- **Brand updates:** When the brand system is updated, all documents must be updated within 30 days

15. APPLICATION EXAMPLES

15.1 Example 1: Complete Module Spread

CHAPTER ONE

The Posterior Points

A study of the 14 primary points
on the back and their clinical
applications

CHAPTER ONE 3

1.1 Introduction to Posterior Points

The back holds fourteen of the twenty-eight primary
Sunnah cupping points, making it the most significant
anatomical region for hijama practice. These points,
located along the Bladder Meridian and its associated
pathways, serve as gateways for detoxification, pain
relief, and systemic regulation.

In this chapter, we will examine each point with
anatomical precision, drawing upon classical Islamic
sources, modern anatomical knowledge, and clinical
observation from the Sunnah Remedies practice.

"The Prophet (ﷺ) had cupping performed between
his shoulders, and he said: 'This is the place
where Satan settles if he is to settle anywhere.'"

— Sahih al-Bukhari, Hadith 5694

This hadith establishes Al-Kahil (between the shoulders) as the preeminent Sunnah point — a location of both spiritual and physiological significance.

15.2 Example 2: Clinical Spread

PAGE 4 (Left) — CLINICAL PAGE

CLINICAL PROTOCOL	
1.2 Al-Kahil (Between the Shoulders)	
[DIAGRAM] Figure 1.3	ANATOMICAL LOCATION
	• Between the scapulae
	• T3-T5 vertebral level
	• Over the rhomboids
PROCEDURE	• Bladder Meridian bilateral pathway
	INDICATIONS
	• General detoxification
	• Chronic back pain
	• Tension headaches
	• Hypertension (adjunct)
	• Fatigue & malaise
	• Immune modulation
1. Cleanse with antiseptic	CONTRAINDICATIONS
	• Pregnancy (relative)
	• Severe anemia
	• Bleeding disorders
	• Local skin infection
CLINICAL NOTE: For wet cupping, use a No. 11 scalpel blade. Incisions should be 2-3mm, superficial, and parallel to skin tension lines. Never incise deeper than 2mm at this location.	

15.3 Example 3: Workbook Spread

PAGE 5 (Right) — WORKBOOK PAGE

WORKBOOK EXERCISE

1.3 Point Identification Practice

INSTRUCTIONS

Study the diagram below and identify the five points marked with letters. Write the correct name and primary indication for each.

[BACK DIAGRAM WITH A-E]

A. _____ Indication: _____

B. _____ Indication: _____

C. _____ Indication: _____

D. _____ Indication: _____

E. _____ Indication: _____

REFLECTION

A patient presents with chronic lower back pain and reports that conventional treatment has provided only temporary relief. Based on what you have learned, which points would you select and what is your clinical reasoning?

15.4 Example 4: Certificate

[ORNATE GEOMETRIC BORDER — 8-FOLD ROSETTE]

SUNNAH REMEDIES ACADEMY

CERTIFICATE OF COMPLETION

This is to certify that

ABDULLAH BIN AHMAD AL-RASHID

has successfully completed

The Advanced Practitioner Diploma
in Hijama Therapy

comprising 120 hours of theoretical study,
40 hours of supervised clinical practice,
and a comprehensive practical examination.

Awarded this 15th day of Ramadan, 1447 AH

APPENDIX A: QUICK REFERENCE CARD

A4 One-Page Cheat Sheet

SUNNAH REMEDIES ACADEMY — VISUAL IDENTITY QUICK REFERENCE
GRID: 12 columns Gutter: 4mm Baseline: 6pt
TYPE: Cormorant Garamond (headings) Inter (body) Amiri (Arabic)
SCALE: 1.25 ratio D1:72pt → B4:10pt
SPACING: Fibonacci tokens space-1:2pt → space-12:144pt
MARGINS: Cover 30mm Editorial 25mm Clinical 20mm Poster 15mm Certificate 20mm Digital 48px
DIVIDERS: A-Full B-Partial C-Golden D-WhiteSpace E-Ornamental F-Clinical
PAGE TYPES: Module Cover Title Editorial Clinical Assessment Workbook Poster Certificate
DENSITY: Certificate 20% → Poster 80% (target, not max)
RHYTHM: Rest → Flow → Pause → Focus → Engage → Test
NEVER: Shadows Gradients 3D effects Neon colors Clip art Unsourced claims Disrespectful design
ALWAYS: Grid alignment Baseline rhythm White space Sacred respect Clinical accuracy Arabic integrity

APPENDIX B: DIGITAL ADAPTATION NOTES

Screen-Specific Adjustments

Parameter	Print (300dpi)	Digital (72dpi)	Retina (144dpi)
Base unit	1pt = 0.3528mm	1px	1px
Grid	12-column, mm-based	12-column, px-based	12-column, px-based
Type scale	Same ratios, pt units	Same ratios, px units	Same ratios, px units ×2
Spacing	pt-based tokens	px-based tokens	px-based tokens ×2
Margins	mm	px (48px base)	px (96px base)
Line height	18pt body	24px body	48px body
Minimum touch target	N/A	44×44px	88×88px

Table 4 – continued

Parameter	Print (300dpi)	Digital (72dpi)	Retina (144dpi)
Maximum content width	176mm	960px	960px

Responsive Behavior

Desktop (1024px)

- Full 12-column grid
- Sidebars visible
- Multi-column layouts active
- Hover states enabled

Tablet (768–1023px)

- 12-column grid with wider gutters
- Sidebars collapse to drawers or below content
- Two-column becomes single-column for editorial
- Touch targets maintained

Mobile (<768px)

- 6-column simplified grid (12-column logic halved)
- Single column for all text
- Stacked layouts only
- Minimum 44px touch targets
- Hamburger navigation
- Accordion sections for long content

Digital-Only Elements

- **Buttons:** Inter SemiBold, 14px, 12px horizontal padding, 8px vertical padding, 2px corner radius, Deep Gold background with Cream text (primary) or 1pt Deep Gold border with Deep Gold text (secondary)
- **Forms:** Inter Regular, 14px, 1pt Slate border, 12px internal padding, 2px corner radius
- **Modals:** White background, 24px padding, 1px Slate shadow (subtle), 4px corner radius
- **Tooltips:** Charcoal background, Cream text, Inter Regular 12px, 8px padding, 2px corner radius
- **Loading states:** Deep Gold spinner, 24px, 2px stroke
- **Progress bars:** 4px height, Deep Gold fill, Slate track

APPENDIX C: PRINT PRODUCTION NOTES

Paper Specifications

Document Type	Paper Weight	Finish	Color
Module covers	300gsm	Soft-touch matte	White
Text pages	120gsm	Uncoated	Cream or White
Certificates	250gsm	Laid texture	Cream
Posters	200gsm	Satin	White
Workbooks	100gsm	Uncoated	White (for writing)

Binding Specifications

Document Type	Binding	Notes
Course modules	Perfect bound	3mm spine minimum
Workbooks	Spiral bound	Lies flat for writing
Reference guides	Wire-o bound	Lies flat, durable
Certificates	Unbound	Presented in envelope or folder
Posters	Unbound	Rolled in tube or flat in folder

Color Profiles

- **Print:** CMYK — Coated GRACoL 2006
- **Digital:** RGB — sRGB IEC61966-2.1
- **Deep Gold CMYK:** C:25 M:35 Y:65 K:15
- **Deep Gold RGB:** R:180 G:140 B:60
- **Deep Gold Pantone:** 7555 C (approximate)

Bleed and Trim

- **Bleed:** 3mm on all sides for full-bleed elements
- **Trim:** Final cut size (A4: 210×297mm, US Letter: 216×279mm)
- **Safe area:** 10mm inside trim for critical elements
- **Slug:** Optional 5mm outside bleed for printer marks

“Design is not just what it looks like and feels like. Design is how it works.” — Steve Jobs

“And We have certainly made the Quran easy for remembrance.” — Surah Al-Qamar, 54:17

May this system serve the knowledge it carries. May every page be a door to understanding. May every design decision honor the tradition it represents.
