Certificate Verification System

UNIQUE CERTIFICATE ID

Format: SRA-CERT-[YEAR]-[GRADUATE-SEQ]-[HASH]. Example: SRA-CERT-2026-0047-A7F3K. Printed in metallic gold foil on certificate. Hash is alphanumeric, 5 characters.

BLOCKCHAIN VERIFICATION

Certificate hash stored on public blockchain (Ethereum or Polygon). Verifiable via academy website without revealing personal data. Timestamped and immutable.

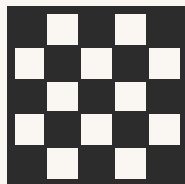

PHYSICAL SECURITY FEATURES

Guilloche pattern background (complex geometric lines), microprint border ("SRA AUTHENTIC" repeated), UV-reactive ink (SRA monogram visible under blacklight), holographic sticker with Academy seal.

VERIFICATION PORTAL

Clean, elegant web page: enter certificate ID, see graduate name, program, completion date, and digital seal of authenticity. Option to download verification PDF. Mobile-optimized.

QR Verification Concepts

Branded QR with Academy seal center

DOCUMENT QR

Links to verification page showing document ID, version, last updated date, authorized download status, and document classification.

CERTIFICATE QR

Direct link to blockchain verification. Displays graduate credentials, program details, and completion date without requiring manual ID entry.

MODULE QR

Links to module landing page with syllabus, instructor bio, learning outcomes, and enrollment status. Embedded in printed handbooks and presentation slides.

***QR Design Specification:** Centered Academy seal icon (8mm) within QR code quiet zone. Quiet zone: 4 modules minimum. Color: #2C2C2C on #FAF7F2 background. Error correction: Level H (30% redundancy). Minimum print size: 20mm × 20mm.*

12

Anti-Copy Design Principles

MOIRE PATTERN BACKGROUNDS

Subtle geometric background patterns that distort when photocopied or scanned, revealing "COPY" or "VOID" text. Created using fine line interference at 0.3mm spacing.

THERMOCHROMIC INK

Certificate seal changes color when warmed by finger touch (gold → deep amber), returning to gold when cool. Impossible to replicate with standard digital or offset printing.

MICROTEXT INTEGRATION

1pt text woven into borders and decorative elements. Reads "SRA AUTHENTIC" under 10x magnification. Becomes illegible blur when photocopied or scanned at standard resolution.

DIGITAL DRM PROTECTION

PDFs encrypted with recipient-specific AES-256 key. Screen capture disabled via JavaScript. Printing allowed only for ACADEMY-classified docs, with automatic user ID watermark on every printed page.

VARIABLE DATA PRINTING

Each printed copy has unique micro-variations in dot position, line weight, and spacing invisible to the naked eye but detectable by forensic analysis. Enables tracing of leaked documents.

METADATA & FINGERPRINTING

Author, creation date, recipient email, device fingerprint, and GPS coordinates (if permitted) embedded invisibly in image EXIF data and document XMP metadata.
