

SUNNAH REMEDIES ACADEMY

Medical Illustration System

I. DESIGN PHILOSOPHY

“Where Ibn Sina’s precision meets Vogue’s refinement”

Our illustration system bridges the gap between clinical accuracy and visual luxury. Every illustration must be immediately recognisable as Sunnah Remedies Academy work—authoritative yet beautiful, scientific yet soulful. The aesthetic draws from:

- **Classical medical atlases** (Netter, Gray’s Anatomy) for anatomical fidelity
- **Luxury editorial design** (Kinfolk, Cereal, Monocle) for restraint and elegance
- **Islamic manuscript illumination** for decorative restraint and golden accents
- **Contemporary flat illustration** (Noma Bar, Malika Favre) for clarity and modernity

The result: illustrations that educate with authority and delight with beauty.

II. COLOUR SYSTEM

Primary Palette

Role	Colour	Hex	Pantone	Usage
Sunnah Gold	Warm antique gold	#C9A84C	7555 C	Primary highlights, key structures, accent lines, labels
Anatomy Rose	Dusty rose	#B87A7A	7522 C	
Vein Azure	Muted teal-blue	#4A7C8C	7695 C	Muscles, soft tissue, connective tissue
Arterial Coral	Soft coral	#D4896E	7416 C	Venous system, blood vessels, deoxygenated pathways
Lymph Jade	Sage green	#7A9E7E	7496 C	Arterial system, oxygenated pathways, inflammation
Skin Nude	Warm beige	#D4B89A	4755 C	Lymphatic system, immune response, detoxification
Bone Ivory	Warm white	#F5F0E8	7499 C	Epidermis, dermis, skin layers
Deep Shadow	Charcoal	#2C2C2C	Black 7 C	Skeletal structures, bone tissue
				Outlines, shadows, primary text

Secondary Palette

Role	Colour	Hex	Usage
Hijama Crimson	Deep burgundy	#8B2D3B	Cupping marks, blood in procedures, cautions
Nerve Silver	Pale grey-blue	#A8B5C4	Nervous system, neural pathways
Fat Cream	Pale yellow	#F0E6D2	Adipose tissue, subcutaneous fat
Organ Terracotta	Earthy brown	#A67B5B	Internal organs, viscera
Background Parchment	Warm off-white	#FAF7F2	Canvas background, negative space

Gradient Rules

- **Never use harsh gradients.** All gradients must be subtle, moving no more than 20% in lightness value.
- **Preferred gradient types:** Linear (top-to-bottom light), radial (centre glow for focal points).
- **Gold gradients:** #C9A84C → #E8D5A3 (never metallic/chrome—always warm, antique).
- **Tissue gradients:** Always follow natural light direction (top-left light source).

Accessibility

- All colour combinations must meet WCAG AA standards (4.5:1 contrast for text).
- Colour must never be the sole differentiator—always pair with line weight, pattern, or label.
- Provide greyscale-safe alternatives for all illustrations.

III. LIGHTING & SHADOWS

Light Source Convention

- **Primary light:** Top-left at 45° (consistent across all illustrations).
- **Secondary fill:** Bottom-right at 30° (soft, warm, 30% intensity of primary).
- **Ambient light:** Warm, from above (simulates natural daylight).

Shadow System

Type	Opacity	Blur	Colour	Usage
Cast Shadow	15%	8px	#2C2C2C	Objects casting onto surfaces
Form Shadow	20%	0px (hard edge)	#2C2C2C	Surface curvature, muscle definition
Ambient Occlusion	25%	4px	#2C2C2C	Crevices, joints, deep folds
Drop Shadow (UI)	10%	12px	#2C2C2C	Labels, callouts, floating elements

Shadow Philosophy

- Shadows are **restrained and elegant**—never cartoonish or heavy.
- Use shadows to create depth, not drama. The feeling should be “floating gently above parchment,” not “dropping into a void.”
- In cross-sections, shadows indicate depth of cut (darker = deeper tissue).

IV. LINE WEIGHT SYSTEM

Primary Lines

Weight	Usage	Colour
0.75pt	Primary outlines, major anatomical boundaries	#2C2C2C
0.5pt	Secondary structures, internal divisions	#2C2C2C at 70% opacity
0.25pt	Tertiary details, texture lines, capillaries	#2C2C2C at 40% opacity

Accent Lines

Weight	Usage	Colour
1.0pt	Gold highlights on key structures, Sunnah Gold emphasis	#C9A84C
0.5pt	Dashed guidelines, measurement lines, flow arrows	#C9A84C at 60% opacity
0.25pt	Dotted lines for hidden/underlying structures	#2C2C2C at 30% opacity

Line Style Conventions

- **Solid lines:** Visible, surface structures.
- **Dashed lines:** Hidden structures, cut surfaces, or structures behind a plane.
- **Dotted lines:** Nerves, lymphatic vessels (fine, delicate).
- **Double lines:** Arteries (thick outer, thin inner wall).
- **Wavy lines:** Fascia, connective tissue membranes.

Corner Treatment

- **Anatomical outlines:** Slightly rounded corners (2px radius) to avoid clinical sharpness.
- **Equipment/technical:** Sharp corners for precision.
- **Flowchart elements:** 4px radius for approachability.

V. PERSPECTIVE SYSTEM

Standard Views

View	Angle	Usage	Notes
Anterior	0° straight-on	Primary anatomical reference	Most common, clearest
Lateral	90° side	Profile views, depth relationships	
Oblique	45°	3D organ views, equipment	Shows depth without distortion
Superior	Top-down	Brain, cross-sections, cup placement	
Isometric	30° angle	Equipment, clinical setups	No perspective distortion, scalable
Cutaway	Variable	Internal structures, layered diagrams	See Section XI

Perspective Rules

- **Human figures:** Always use 3/4 view or lateral view for dynamism. Never flat frontal unless necessary.
- **Organs:** Oblique view preferred to show 3D form.
- **Equipment:** Isometric for technical accuracy; perspective for dramatic effect.
- **Flowcharts:** Flat, 2D with subtle depth (shadows only).

Depth Cues

- **Atmospheric perspective:** Distant/far structures are 20% lighter in value and 10% desaturated.
- **Overlap:** Always use natural anatomical overlap—never force separation.
- **Size gradient:** Follow anatomical truth; never exaggerate for effect.

VI. TEXTURES

Approved Textures

Texture	Application	Specification
Parchment grain	Backgrounds, negative space	Subtle, 3% opacity, warm beige
Muscle fibre	Muscle cross-sections	Parallel lines, 0.25pt, 15° angle, #B87A7A at 30%
Bone trabeculae	Bone interior	Fine mesh pattern, #F5F0E8 at 20%
Skin pore	Epidermis close-up	Tiny dots, #D4B89A at 15%, random distribution
Blood flow	Vessels, capillaries	Directional dash pattern, 0.25pt, arrowheads
Lymphatic dotted	Lymph vessels	Dotted line, 0.25pt, #7A9E7E
Fat lobule	Adipose tissue	Soft circular clusters, #F0E6D2 at 40%

Table 7 – continued

Texture	Application	Specification
Fascia weave	Connective tissue	Crosshatch, 0.25pt, 45° angle, #2C2C2C at 15%

Texture Rules

- Textures must be **subtle**—never compete with primary information.
- All textures are **vector-based** (no raster images) for scalability.
- Texture opacity never exceeds 30% unless in extreme close-up.
- Combine textures with colour to differentiate tissues—never rely on texture alone.

VII. TYPOGRAPHY FOR ILLUSTRATIONS

Label Typography

Element	Font	Weight	Size	Colour	Case
Primary label	Cormorant Garamond	SemiBold	10pt	#2C2C2C	Title Case
Secondary label	Cormorant Garamond	Regular	8pt	#2C2C2C at 70%	Title Case
Tertiary detail	Source Sans Pro	Regular	7pt	#2C2C2C at 50%	Sentence case
Numerical callout	Source Sans Pro	Bold	9pt	#C9A84C	—
Measurement	Source Sans Pro	Regular	7pt	#2C2C2C at 60%	—
Caution/Warning	Source Sans Pro	Bold	8pt	#8B2D3B	UPPERCASE

Leader Lines & Callouts

- **Leader lines:** 0.5pt, #C9A84C at 80%, with small dot at origin and arrow at label.
- **Label boxes:** 2px radius, filled with #FAF7F2 at 95% opacity, 0.5pt #C9A84C border.
- **Numbered callouts:** Gold circle (12px diameter), white number, placed on structure.
- **Avoid crossing leader lines.** If unavoidable, use slight curve (Bezier) to separate.

Typography Rules

- Minimum 7pt for any label—never smaller.
- Labels should read left-to-right, top-to-bottom where possible.
- Arabic terminology may be included in parentheses (Source Sans Pro, Regular, 7pt, #C9A84C).
- Line spacing: 1.2× for multi-line labels.

VIII. ANATOMY ILLUSTRATION SPECIFICATIONS

Human Figure

- **Proportion:** Accurate anatomical proportion (7.5 heads tall for adults).
- **Style:** Semi-realistic—accurate form with stylised, clean lines.
- **Gender:** Neutral or clearly indicated; never sexualised.
- **Ethnicity:** Medium skin tone (#D4B89A) as default; provide diversity in series.
- **Pose:** Active, functional poses (e.g., arm raised for shoulder anatomy) rather than static standing.

Muscles

- **Fill:** #B87A7A with directional fibre texture.
- **Origin/Insertion:** Marked with small gold dots and labelled.
- **Action arrows:** Curved gold arrows showing direction of contraction.
- **Superficial vs. Deep:** Superficial = full opacity; Deep = 60% opacity with dashed outline.
- **Muscle groups:** Slightly different tints of Anatomy Rose ($\pm 5\%$ lightness) to differentiate adjacent muscles.

Blood Vessels

- **Arteries:** Double-line, #D4896E, with directional arrowheads.
- **Veins:** Single line, #4A7C8C, slightly wider than arteries, with valve indicators.
- **Capillaries:** Dotted line, 0.25pt, #D4896E at 50%.
- **Blood flow:** Subtle directional animation-style dashes (static) inside vessels.
- **Anastomoses:** Gold dot at junction points.

Lymphatics

- **Vessels:** Dotted line, 0.25pt, #7A9E7E.
- **Nodes:** Small circles (4px), #7A9E7E fill, #2C2C2C outline.
- **Direction:** Always toward heart (thoracic duct).
- **Highlight:** Lymph nodes glow subtly (radial gradient, #7A9E7E at 20% opacity, 8px blur).

Skin

- **Epidermis:** #D4B89A with pore texture.
- **Dermis:** Slightly darker #C4A88A with vessel network.
- **Hypodermis:** #F0E6D2 with fat lobule texture.
- **Hair follicle:** Cross-section shows bulb, shaft, sebaceous gland.
- **Sweat gland:** Coiled structure, #A8B5C4 at 40%.

IX. HIJAMA PROCEDURE ILLUSTRATIONS

Cup Placement Views

- **Primary view:** Lateral or oblique body view with cup positions.
- **Cup representation:** Simplified glass cup shape, #A8B5C4 at 30% fill (translucent), 0.75pt outline.
- **Sunnah points:** Marked with gold starburst (8-point, 12px diameter) with label.
- **Blood inside cup:** #8B2D3B at 40% fill, shown only in cutaway views.

- **Skin reaction:** Subtle redness gradient around cup rim (#D4896E at 15%, 6px blur).

Procedure Steps

- **Step numbering:** Large gold numerals (Cormorant Garamond, 24pt, #C9A84C) in top-left of each step panel.
- **Step panels:** 4px radius, #FAF7F2 fill, 0.5pt #C9A84C border, 8px padding.
- **Before/After:** Split view with subtle gold vertical divider.
- **Hands:** Clean, neutral hands (no jewellery, short nails, medium skin tone) performing procedure.
- **Patient modesty:** Always maintain appropriate coverage; use draping lines to indicate towels/gowns.

Equipment

- **Glass cups:** Transparent, slight blue tint (#A8B5C4 at 20%), highlight reflection (white ellipse, 10% opacity).
- **Pump:** Isometric view, #2C2C2C outline, mechanical details in #C9A84C accents.
- **Scalpel/lancet:** Shown in context only; never isolated or glorified. #A8B5C4 blade, #2C2C2C handle.
- **Alcohol swabs, cotton:** Soft, textured, #F5F0E8 with subtle shadow.

X. CLINICAL PATHWAYS & FLOWCHARTS

Shape Language

Element	Shape	Fill	Border	Notes
Start/End	Rounded rectangle (8px radius)	#F5F0E8	0.75pt #2C2C2C	“Begin Assessment” / “Treatment Complete”
Process	Rectangle (4px radius)	#FAF7F2	0.5pt #2C2C2C	Standard step
Decision	Diamond (45° rotation)	#FAF7F2	0.75pt #C9A84C	Yes/No branch
Hijama Action	Rectangle with gold left border (3px)	#FAF7F2	0.5pt #2C2C2C	Cupping intervention
Caution	Rounded rectangle with crimson dot	#FAF7F2	0.5pt #8B2D3B	Contraindication warning
Outcome	Circle	#C9A84C at 15%	0.75pt #C9A84C	Result/goal

Connectors

- **Standard flow:** 0.5pt solid #2C2C2C with arrowhead.
- **Yes/True branch:** 0.5pt solid #7A9E7E with arrowhead.
- **No/False branch:** 0.5pt dashed #8B2D3B with arrowhead.
- **Return/Loop:** 0.5pt curved #C9A84C with arrowhead, returning to previous step.

Layout

- **Direction:** Top-to-bottom, left-to-right.
 - **Spacing:** Minimum 40px between elements.
 - **Alignment:** Strict grid; never staggered randomly.
 - **Background:** #FAF7F2 with subtle parchment texture.
-

XI. CROSS-SECTIONS & CUTAWAY DIAGRAMS

Cut Surface Treatment

- **Cut plane:** Indicated by fine diagonal hatching (0.25pt lines, 45°, #2C2C2C at 10%) or solid #F5F0E8 fill.
- **Depth gradient:** Structures farther from cut surface are 10% darker and 5% desaturated.
- **Organ exposure:** Internal organs shown in natural colours with full detail.

Layer Diagrams (Skin, etc.)

- **Layer separation:** 1px gap between layers with subtle shadow (2px blur, 10% opacity).
- **Layer labels:** Placed to the right, connected with gold bracket ({} shape, 0.75pt).
- **Zoom insets:** Circular callout (24px diameter) with gold border, showing detail at 2× scale.
- **Thickness measurements:** Double-headed arrow with numerical label (Source Sans Pro, 7pt).

Exploded Views

- **Separation lines:** Dashed gold lines connecting separated parts to original position.
 - **Explosion direction:** Logical anatomical direction (e.g., skin pulls upward, bone stays).
 - **Ghost outlines:** Original position shown as 15% opacity grey outline.
-

XII. INFOGRAPHICS

Data Visualisation

- **Bar charts:** Rounded bars (2px radius), #C9A84C for primary, #B87A7A for secondary, #4A7C8C for tertiary.
- **Pie charts:** Donut style (40% inner radius), segments separated by 2px white gap.
- **Line graphs:** 1.5pt line, #C9A84C, data points as 4px gold circles.
- **Icons within charts:** Simplified anatomical icons (see Icon System) as data point markers.

Composition

- **Rule of thirds:** Primary information in upper-left intersection.
- **Negative space:** Minimum 30% of canvas should be breathing space.
- **Hierarchy:** Title (Cormorant Garamond, 18pt) → Subtitle (14pt) → Data (10pt) → Source (7pt).
- **Dividers:** Thin gold lines (0.5pt) or decorative Islamic geometric motifs (simplified, 10% opacity) as section dividers.

Statistical Callouts

- **Large numbers:** Cormorant Garamond, 48pt, #C9A84C, with small gold underline (2px).
- **Context text:** Source Sans Pro, 10pt, #2C2C2C, placed below number.
- **Icon pairing:** Relevant anatomical icon (32px) to the left of number.

XIII. LABEL & CALLOUT SYSTEM

Numbered Callouts

1. **Gold circle:** 12px diameter, #C9A84C fill, white number (Source Sans Pro Bold, 8pt).
2. **Placement:** On or immediately adjacent to the structure.
3. **Key panel:** Right side or bottom, listing numbers with corresponding labels.
4. **Key styling:** #FAF7F2 background, 0.5pt #C9A84C border, 8px padding, 4px radius.

Direct Labels

- **Leader line:** 0.5pt #C9A84C, with 2px dot at structure and horizontal landing for text.
- **Text:** Cormorant Garamond SemiBold, 10pt, #2C2C2C.
- **Avoid:** Crossing leader lines, labels over important structures, vertical text.

Annotation Boxes

- **Type:** Rounded rectangle, 4px radius, #FAF7F2 fill, 0.5pt #C9A84C border.
- **Title:** Cormorant Garamond SemiBold, 10pt, #C9A84C.
- **Body:** Source Sans Pro Regular, 8pt, #2C2C2C.
- **Icon:** Small 16px anatomical icon in top-left corner of box.

Zoom Callouts

- **Shape:** Circle or rounded rectangle, 2px gold border.
- **Connection:** Thin gold line (0.5pt) to zoomed area.
- **Magnification:** “2×” or “4×” in top-right corner (Source Sans Pro Bold, 7pt, #C9A84C).

XIV. PRODUCTION SPECIFICATIONS

File Formats

Use Case	Format	Resolution	Colour Mode
Print (textbooks)	PDF/X-4, AI	300 DPI	CMYK
Digital (web, e-learning)	SVG, PNG	72-150 DPI	RGB
Presentation slides	SVG, PNG	150 DPI	RGB
Animation source	AI, SVG	Vector	RGB

Artboard Sizes

- **Textbook full-page:** 210mm × 297mm (A4) with 15mm margins.

- **Textbook half-page:** 210mm × 148mm.
- **Digital wide:** 1920px × 1080px.
- **Digital square:** 1080px × 1080px (social/Instagram).
- **Presentation:** 1920px × 1080px, with 60px margin on all sides.

Export Rules

- **SVG:** All text converted to outlines for web; preserve editable text for master files.
- **PNG:** Transparent background for flexible placement; white background for print.
- **PDF:** Embed all fonts, preserve layers for future editing.

XV. ILLUSTRATION DO'S AND DON'TS

DO

- ☒ Use consistent light source (top-left) across all illustrations.
- ☒ Include subtle parchment texture in backgrounds for warmth.
- ☒ Label every significant structure—assume the viewer is learning.
- ☒ Use gold accents sparingly but deliberately to draw the eye.
- ☒ Maintain anatomical accuracy above stylistic flourish.
- ☒ Provide scale bars or reference measurements where relevant.
- ☒ Use Islamic geometric motifs as subtle decorative elements (borders, dividers) at 10% opacity.
- ☒ Include Arabic terminology in parentheses where culturally relevant.

DON'T

- ☒ Use neon, saturated, or clashing colours.
- ☒ Create heavy drop shadows or 3D bevel effects.
- ☒ Use raster images, photographs, or clip art.
- ☒ Label in fonts other than Cormorant Garamond or Source Sans Pro.
- ☒ Show blood or procedure details gratuitously—always with educational purpose.
- ☒ Use perspective distortion that compromises anatomical truth.
- ☒ Overcrowd illustrations—break complex topics into series.
- ☒ Use generic stock icons or illustrations—everything must be custom Sunnah Remedies style.

XVI. ILLUSTRATION CHECKLIST

Before any illustration is approved for publication:

- Colour palette matches system exactly (spot-check hex values).
- Light source is consistent (top-left).
- All labels are legible at intended output size (minimum 7pt).
- Leader lines do not cross or obscure key structures.
- Arabic terms are included where appropriate (in gold, parentheses).
- Accessibility: colour-blind safe, greyscale readable.
- Anatomical accuracy verified by medical advisor.
- File exported in all required formats (SVG, PNG, PDF).

- Master file archived with editable layers and fonts.
- Illustration matches Sunnah Remedies Academy tone: authoritative, beautiful, serene.

This Medical Illustration System ensures that every visual produced by Sunnah Remedies Academy carries the same authority, beauty, and recognisability. Whether in a textbook, on a presentation slide, or in a digital course, the illustrations will feel unmistakably ours—where the precision of medicine meets the poetry of design.
