

SUNNAH REMEDIES ACADEMY

PHOTOGRAPHY STYLE GUIDE

1. FOUNDATIONAL PHILOSOPHY

The Sunnah Remedies Visual Covenant

Every photograph is a *shahada* of trust. We do not merely document—we consecrate. The camera lens becomes a witness to the sacred intersection of prophetic wisdom and clinical excellence. Every frame must breathe with three qualities:

- **Tawakkul (Trust)** — The quiet confidence that healing comes from Allah, expressed through serene compositions and unhurried pacing
- **Ihsan (Excellence)** — The prophetic standard of doing everything beautifully, reflected in meticulous detail and premium execution
- **Sakina (Tranquillity)** — The divine peace that descends upon healing spaces, captured through soft light, natural materials, and contemplative stillness

The Golden Rule: No photograph may ever feel clinical, cold, or corporate. We are not a hospital. We are a *bayt al-shifa*—a house of healing. Every image must feel like stepping into a sanctuary.

2. LIGHTING

2.1 The Sunnah Light Principle

Light is the first element Allah created. Our lighting honours this primacy.

Primary Approach: Natural-First, Augmented-Second

Scenario	Lighting Strategy
Clinic interiors	Maximal natural light; supplement with warm LED panels (3200K)
Treatment rooms	Soft diffused window light + subtle bounce from cream reflectors
Product photography	Single large soft source from above-left, mimicking north-facing window
Portraits	Rembrandt-style window light with gold reflector fill
Detail shots (cupping, herbs)	Macro ring light at 10% intensity for texture, natural key light

2.2 Technical Specifications

- **Colour Temperature:** 3200K–4000K (warm white to neutral warm)
- **Never use:** Cool fluorescent, harsh direct flash, or mixed colour temperatures
- **Shadow quality:** Soft, feathered edges. No hard shadows on faces
- **Contrast ratio:** 2:1 to 3:1 (gentle modelling, never dramatic noir)
- **Golden hour priority:** Schedule all outdoor/near-window shoots within 90 minutes of sunrise or sunset

2.3 The “Sakina Glow”

Our signature lighting effect: a subtle warm rim light that separates subjects from backgrounds, creating a halo of tranquillity. Achieved by:

- Positioning subjects 2–3 metres from large windows
- Using sheer linen curtains as natural diffusion
- Bouncing a warm LED into a cream wall behind the subject

2.4 AI Prompt — Lighting

Editorial photography, warm natural window light streaming through sheer linen curtains, soft golden
↪ hour glow, Rembrandt lighting on subject's face, gentle shadows with feathered edges, 3200K colour
↪ temperature, subtle warm rim light creating a halo effect, no harsh flash, no cool fluorescent
↪ tones, sacred light quality, tranquil atmosphere, premium editorial style --ar 4:5 --style raw

3. COLOUR GRADING

3.1 The Sunnah Palette in Photography

Our photographs must feel like they were captured in a world where the Sunnah Palette is the natural order of light.

Primary Grade:

- **Highlights:** Warm cream (#F5F0E8) with subtle golden lift
- **Midtones:** Earth tones pulled toward olive and terracotta
- **Shadows:** Deep espresso (#3D2B1F) with warm undertones—never cold blue-black
- **Skin tones:** Preserved in warm neutrality; no orange oversaturation

Secondary Elements:

- Greens: Muted sage and olive (never neon or saturated)
- Blues: Dusty indigo and slate (only in textiles or ceramics, never dominant)
- Golds: Subtle and metallic, never yellow

3.2 Technical Grading Specs

Parameter	Setting
Overall saturation	-10 to -15%
Skin tone saturation	-5% (preserved naturalness)
Warmth/temperature	+8 to +12
Tint	+2 toward magenta (prevents sickly green)
Highlight roll-off	Soft, film-like
Shadow detail	Preserved; never crushed to pure black
Grain	Subtle 35mm film grain (not digital noise)

Table 2 – continued

Parameter	Setting
Vignette	None, or maximum -5% subtle darkening at edges

3.3 Mood Variations

Context	Grade Adjustment
General clinic	Standard Sunnah grade
Treatment in progress	Slightly warmer (+3), emphasising comfort
Educational content	Slightly brighter, maintaining warmth
Evening/ramadan content	Deeper shadows, warmer highlights, +5% film grain
Product/herb detail	Slightly desaturated, emphasising texture over colour

3.4 AI Prompt — Colour Grading

```
Editorial colour grading, warm cream highlights, deep espresso shadows with warm undertones, muted sage
↪ and olive greens, dusty indigo accents, reduced saturation -10%, film-like highlight roll-off,
↪ preserved shadow detail, subtle 35mm film grain, skin tones in warm neutrality, no cold blue
↪ shadows, no neon saturation, premium editorial photography grade, Sunnah-inspired earth tone
↪ palette --ar 4:5 --style raw
```

4. COMPOSITION

4.1 Sacred Geometry Principles

Our compositions draw from Islamic artistic traditions while maintaining modern editorial clarity.

The Rule of Thirds (Modified):

- Place the subject’s eyes at the upper third intersection
- Allow generous negative space above the head (20–30% of frame)
- Never crop at joints (neck, elbows, knees, ankles)

The Sunnah Spiral:

- Leading lines should curve gently, never harsh diagonals
- Use architectural arches, curved furniture, or the natural curve of a hand holding a cupping jar
- Create visual flow that draws the eye inward, then upward

Symmetry and Balance:

- Treatment room shots: symmetrical composition with the patient centred
- Portrait shots: asymmetrical, subject off-centre with negative space for text
- Detail shots: centred or slightly off-centre with breathing room

4.2 Aspect Ratios by Use

Application	Ratio	Rationale
Social media portraits	4:5	Vertical, immersive, thumb-stopping
Website heroes	16:9	Cinematic, spacious
Print editorial	3:2	Classic photography standard
Instagram stories	9:16	Full-screen mobile experience
Square thumbnails	1:1	Balanced, iconic

4.3 AI Prompt — Composition

```
Editorial composition, modified rule of thirds with subject eyes at upper intersection, generous
↪ negative space above head, gentle curved leading lines inspired by Islamic geometry, no harsh
↪ diagonals, subject positioned off-centre with breathing room, natural visual flow drawing inward
↪ then upward, 4:5 aspect ratio, architectural arch framing in background, premium editorial
↪ photography, serene and balanced --ar 4:5 --style raw
```

5. CROPPING

5.1 The Sunnah Crop Rules

Cropping is framing intention. Every crop must honour the subject’s dignity.

Forbidden Crops:

- Never crop at the neck (always show shoulders minimum)
- Never crop at joints (elbows, wrists, knees, ankles)
- Never crop fingers at the tips
- Never crop the top of the head (unless extreme close-up with clear intent)

Preferred Crop Points:

- Headshots: Mid-chest to just above head
- Three-quarter: Mid-thigh to generous space above head
- Full body: Feet to generous space above head (minimum 15% headroom)
- Hands at work: Wrist to fingertips, with context of forearm

Contextual Breathing Room:

- Always leave 10–15% more space than feels necessary
- Negative space is not empty—it is *sakina* made visible

5.2 AI Prompt — Cropping

Editorial crop with generous breathing room, 15% headroom above subject, crop at mid-chest for portrait,
↪ never cropping at joints or neck, full context of hands and forearms visible, negative space treated
↪ as intentional design element, 10-15% extra space beyond subject, dignified framing, premium
↪ editorial photography --ar 4:5 --style raw

6. DEPTH OF FIELD

6.1 The Hierarchy of Focus

Depth of field communicates what matters. We use it as a narrative tool.

Scenario	Aperture	Effect
Practitioner portraits	f/2.0–f/2.8	Soft background, sharp eyes, intimate
Patient-practitioner interaction	f/2.8–f/4	Both faces sharp, background softly blurred
Clinic environment	f/5.6–f/8	Everything sharp, showcasing space
Equipment detail	f/2.8–f/4	Tool sharp, background context soft
Herb/product close-up	f/4–f/5.6	Product sharp, natural surface softly blurred
Hands performing treatment	f/2.8	Hands sharp, face softly present in background

Bokeh Quality:

- Circular, creamy bokeh balls from specular highlights
- Never harsh, geometric, or nervous bokeh
- Background lights should render as soft golden orbs

6.2 AI Prompt — Depth of Field

Shallow depth of field, f/2.8 aperture, creamy circular bokeh from background highlights, subject eyes
↪ tack-sharp with soft background blur, intimate portrait quality, premium lens rendering, no harsh
↪ geometric bokeh, warm golden bokeh orbs from window light, cinematic separation between subject and
↪ environment, editorial photography --ar 4:5 --style raw

7. WARDROBE

7.1 The Practitioner Uniform

Practitioners are the face of Sunnah Remedies. Their appearance must communicate authority, modesty, and warmth.

Women Practitioners:

- **Base:** Tailored scrub top in Sunnah Sage or Warm Sand
- **Layer:** Long-sleeved underscrub in cream or white
- **Head:** Hijab in Sunnah Sage, Olive, or Cream—no patterns, subtle texture only
- **Apron:** Leather or canvas apron in Espresso for cupping/herbal preparation
- **Footwear:** Closed-toe leather slippers in tan or espresso
- **Jewellery:** Minimal—single small stud earrings, simple ring, wristwatch
- **Nails:** Natural, clean, short. No polish during treatments

Men Practitioners:

- **Base:** Tailored scrub top in Sunnah Sage or Warm Sand
- **Layer:** Long-sleeved undershirt or thobe in cream or white
- **Head:** Optional kufi in Espresso or Olive
- **Beard:** Neatly trimmed, clean
- **Apron:** Leather apron in Espresso for cupping
- **Footwear:** Leather sandals or closed shoes in tan
- **Jewellery:** Wedding band and wristwatch only

7.2 Patient Wardrobe

- Patients wear clinic-provided robes in cream linen or organic cotton
- For hijab-wearing women: clinic-provided hijab in cream or soft sage
- No visible branding on personal clothing
- Encourage patients to arrive in modest, neutral-toned clothing

7.3 AI Prompt — Wardrobe

```
Practitioner wearing tailored sage green scrub top with cream long-sleeved underscrub, hijab in muted  
↪ olive with subtle linen texture, leather apron in deep espresso, minimal jewellery, clean natural  
↪ nails, modest professional medical attire, warm earth tones, premium fabric textures, no visible  
↪ branding, Islamic modest fashion, editorial photography --ar 4:5 --style raw
```

8. CLINIC INTERIORS

8.1 The Sunnah Healing Space

Every clinic interior must feel like a *ribat*—a fortified place of peace.

Key Elements:

- **Walls:** Limewash in Warm Sand or Sunnah Sage; one accent wall in Espresso with gold calligraphy
- **Flooring:** Natural oak or bamboo, with handwoven prayer rugs as accents
- **Windows:** Sheer linen curtains, always partially drawn to filter light
- **Furniture:** Low-profile treatment beds in cream leather; wooden side tables in walnut
- **Plants:** Olive trees, peace lilies, or dried pampas grass in ceramic vessels
- **Shelving:** Open walnut shelves displaying herbs in amber glass jars, vintage medical texts, and ceramic bowls
- **Lighting:** Brass pendant lights with linen shades; candles (unlit during shoots) in brass holders
- **Calligraphy:** Single piece of framed *Ayat al-Shifa* (Quranic healing verses) in gold on espresso background

Never Include:

- Fluorescent lighting
- Plastic furniture or equipment visible
- Cluttered surfaces
- Generic medical posters
- Bright primary colours

8.2 AI Prompt — Clinic Interiors

```
Premium holistic clinic interior, limewash walls in warm sand colour, natural oak flooring with
↪ handwoven prayer rug accents, sheer linen curtains filtering golden window light, low-profile cream
↪ leather treatment bed, walnut side table with amber glass jars of dried herbs, olive tree in ceramic
↪ vessel, brass pendant light with linen shade, framed gold Arabic calligraphy on espresso accent
↪ wall, open walnut shelving with vintage medical texts, no plastic visible, no fluorescent lighting,
↪ serene sanctuary atmosphere, Islamic healing space, editorial interior photography --ar 16:9
↪ --style raw
```

9. PATIENT DIVERSITY

9.1 The Ummah in Our Clinics

Sunnah Remedies serves the entire *ummah*. Our patients must reflect this beautiful diversity.

Representation Guidelines:

- **Ages:** 18–80+ (children only in family/wellness contexts, not primary treatment)

- **Ethnicities:** Arab, South Asian, African, Southeast Asian, Caucasian, mixed heritage
- **Body types:** All sizes represented with dignity and respect
- **Conditions:** Show patients receiving treatment for various conditions—never focusing on the condition as spectacle, but on the healing journey
- **Hijab diversity:** Some patients in hijab, some not—always respecting the individual’s choice in that moment

The Dignity Rule:

- Never photograph a patient in visible distress
- Never show invasive treatment angles without explicit consent
- Always show the patient as an active participant in their healing, not a passive victim

9.2 AI Prompt — Patient Diversity

```
Diverse patient receiving holistic treatment, South Asian woman in her 40s wearing cream clinic robe and
↳ soft sage hijab, serene expression of trust and comfort, sitting on cream leather treatment bed in
↳ warm sunlit clinic, natural oak floors, olive tree in background, practitioner in sage scrubs gently
↳ preparing herbal remedy, dignified and respectful portrayal, active participant in healing journey,
↳ no visible distress, premium editorial medical photography, Islamic healing space --ar 4:5 --style
↳ raw
```

10. EQUIPMENT STYLING

10.1 The Instruments of Ihsan

Every tool must be presented as a precision instrument of prophetic healing—not as industrial medical equipment.

Cupping (Hijama) Equipment:

- **Cups:** Glass cups with brass or copper rims, never plastic
- **Pump:** Brass or copper manual pump with leather seal
- **Staging:** Cups arranged on a walnut tray with a linen cloth, dried herbs scattered artfully
- **Never show:** Blood in cups in a way that is gratuitous; focus on the cups as objects of beauty before and after use

Herbal Preparation:

- **Mortar and pestle:** Marble or brass, never plastic
- **Scales:** Vintage brass balance scale
- **Storage:** Amber glass jars with handwritten labels in gold ink
- **Preparation:** Herbs on marble slab with brass spoon, natural light from above

General Medical:

- **Stethoscope:** Brass or copper finish, draped elegantly
- **Blood pressure cuff:** Canvas and leather, not nylon
- **Thermometer:** Vintage glass mercury style (for styling only), or modern device in cream casing

10.2 AI Prompt — Equipment Styling

```
Artfully arranged hijama cupping set, glass cups with brass rims on walnut tray with cream linen cloth,
↳ brass manual pump with leather seal, dried herbs scattered naturally, marble mortar and pestle with
↳ ground herbs, vintage brass balance scale, amber glass jars with handwritten gold labels, brass
↳ stethoscope draped elegantly, natural window light from above creating soft shadows, premium
↳ editorial product photography, Islamic healing instruments, no plastic visible --ar 4:5 --style raw
```

11. BACKGROUNDS

11.1 The Sunnah Backdrop System

Backgrounds must recede and support, never compete.

Primary Backgrounds:

- **Textured walls:** Limewash, plaster, or natural stone in Warm Sand, Sunnah Sage, or Cream
- **Natural materials:** Unfinished oak, raw linen, handmade ceramic, pressed paper
- **Botanical:** Dried olive branches, pampas grass, or eucalyptus (never fresh flowers in bright colours)
- **Architectural:** Arched doorways, geometric screens (*mashrabiya*), or simple white plaster niches

Secondary Backgrounds:

- **Gradient:** Soft cream to warm sand, achieved with light falloff
- **Bokeh environmental:** Clinic interior softly blurred behind subject
- **Negative space:** Plain cream wall with single piece of calligraphy or ceramic vessel

Forbidden Backgrounds:

- White seamless paper (too clinical)
- Coloured paper backdrops (too artificial)
- Busy patterns or stripes
- Generic stock backgrounds
- Any background with visible electrical outlets, fire extinguishers, or institutional signage

11.2 AI Prompt — Backgrounds

```
Textured limewash wall in warm sand colour as background, subtle plaster texture visible, soft natural
↳ light creating gentle gradient from cream to warm sand, single dried olive branch in handmade
↳ ceramic vessel on wooden surface, minimal and serene, no patterns, no artificial backdrops, premium
↳ editorial photography background, Islamic aesthetic, tranquil and supportive --ar 4:5 --style raw
```

12. ISLAMIC MODESTY

12.1 The Modesty Framework

Modesty is not restriction—it is dignity made visible. Our photography must honour this without compromising beauty or professionalism.

Universal Rules:

- **No skin below the elbow or knee is visible on women** (except hands during treatment, which is permissible)
- **No skin below the knee is visible on men** (shorts are never permitted in any clinical context)
- **No tight or revealing clothing on any subject**
- **No physical contact between non-mahram men and women** in photographs
- **Patient draping:** Patients are always properly draped with clinic linens during treatment; only the treatment area is minimally exposed
- **Hijab:** Women practitioners and hijab-wearing patients must have hair fully covered with hijab styled neatly and professionally

Treatment Photography:

- For cupping on the back: patient draped with linens, only the cupping area visible
- For facial treatments: patient in full hijab if applicable, face visible for treatment
- For hand/foot treatments: patient fully clothed, only extremity visible
- **Never show:** Patients in states of undress beyond what is medically necessary

Gender Pairing in Photography:

- Female practitioners with female patients
- Male practitioners with male patients
- In mixed settings, ensure appropriate spacing and professional demeanour

12.2 AI Prompt — Islamic Modesty

```
Islamic modest medical photography, female practitioner in sage scrubs and olive hijab treating female
↪ patient in cream clinic robe and hijab, patient fully draped with linens, only treatment area
↪ minimally visible, no skin below elbow or knee showing, professional and dignified, no physical
↪ contact between non-mahram, serene clinic interior with natural light, premium editorial
↪ photography, Islamic modesty principles --ar 4:5 --style raw
```

13. NATURAL MATERIALS

13.1 The Material Language of Prophetic Medicine

Prophetic medicine was practised with materials that came from the earth. Our photography must celebrate these materials.

Primary Materials:

- **Wood:** Oak, walnut, olive wood—unfinished or oil-finished, never glossy lacquer
- **Stone:** Marble, limestone, terrazzo—matte finish preferred
- **Ceramic:** Handmade, slightly imperfect, in cream, sand, or sage glazes
- **Linen and cotton:** Unbleached, textured, slightly wrinkled (never starched or synthetic)
- **Leather:** Vegetable-tanned, natural patina, in tan, espresso, or olive
- **Brass and copper:** Unlacquered, allowing natural tarnish and patina
- **Glass:** Amber, clear, or frosted—never plastic
- **Paper:** Handmade, cotton rag, or pressed botanical paper

Material Pairings:

- Walnut + brass + linen
- Marble + olive wood + ceramic
- Oak + copper + cream cotton
- Limestone + brass + sage linen

Never Include:

- Plastic (in any visible form)
- Chrome or high-gloss metal
- Synthetic fabrics (polyester, nylon, acrylic)
- Laminate or veneer pretending to be wood
- Neon or artificial materials

13.2 AI Prompt — Natural Materials

```
Close-up of natural materials in healing space, olive wood mortar with brass pestle on marble surface,  
↪ handmade ceramic bowl with dried herbs, vegetable-tanned leather journal with cotton rag paper,  
↪ unlacquered brass vessel with natural patina, amber glass bottle with linen label, natural window  
↪ light highlighting wood grain and stone texture, no plastic, no synthetic materials, no chrome,  
↪ premium editorial material photography, prophetic medicine aesthetic --ar 4:5 --style raw
```

14. MOOD

14.1 The Sunnah Mood Spectrum

Our mood is not one-note. It shifts across contexts while maintaining a unified emotional core.

Context	Mood	Visual Cues
Welcome/arrival	Anticipatory calm	Soft light, open space, patient entering
Consultation	Attentive warmth	Eye contact, leaning in, gentle gestures
Treatment	Deep serenity	Closed eyes, relaxed posture, soft focus
Post-treatment	Renewed lightness	Slight smile, brighter light, sitting up
Education	Quiet authority	Practitioner speaking, patient listening, books open
Product/herb	Contemplative reverence	Still life, dramatic but soft light, texture
Community	Gentle joy	Multiple people, warm light, shared space

The Mood Anchor: Every photograph must feel like a deep breath. The viewer should feel their shoulders drop and their breath slow. This is *sakina*.

14.2 AI Prompt — Mood

```
Editorial photograph capturing deep serenity during holistic treatment, patient with closed eyes and
↳ relaxed posture on cream leather bed, soft diffused window light creating gentle atmosphere,
↳ practitioner in sage scrubs performing cupping with focused calm, warm earth tones, natural
↳ materials, quiet and contemplative mood, no harsh elements, viewer feels shoulders drop and breath
↳ slow, sakina atmosphere, premium editorial medical photography --ar 4:5 --style raw
```

15. EMOTION

15.1 The Emotional Palette

We photograph feelings, not faces. The emotions must be authentic, never performative.

Permitted Emotions:

- **Serenity:** The primary emotion. Soft gaze, relaxed jaw, slow breathing visible
- **Trust:** Eye contact with practitioner, slight smile, open body language
- **Gentle hope:** Looking toward light, slight upward angle
- **Quiet gratitude:** Hands in gentle gesture, eyes soft
- **Focused peace:** During treatment, complete surrender to the process

Forbidden Emotions:

- **Exaggerated happiness:** No wide grins, no laughing at camera (feels like a dental ad)
- **Dramatic pain relief:** No “before/after” grimaces, no theatrical sighs

- **Vulnerability as spectacle:** Never photograph tears or distress for impact
- **False enthusiasm:** No thumbs up, no peace signs, no “influencer” energy

The Eye Rule:

- Eyes are the windows to the soul. They must be in focus.
- Catchlights from windows must be present (shows life and connection)
- Never retouch eyes to remove redness or fatigue—authenticity over perfection

15.2 AI Prompt — Emotion

```
Authentic emotional portrait, patient with soft serene gaze and gentle trust in eyes, slight natural
↪ smile, relaxed jaw, visible catchlights from window light, practitioner making gentle eye contact,
↪ emotion of quiet hope and serenity, no exaggerated expressions, no performative happiness,
↪ authentic and dignified, premium editorial portrait photography, Islamic healing space, emotional
↪ depth without spectacle --ar 4:5 --style raw
```

16. PREMIUM FEEL

16.1 The Luxury of Ihsan

Premium is not about expense. It is about intention. Every element must feel considered, crafted, and cared for.

Premium Markers:

- **Sharp focus where it matters:** Eyes, hands, product details—always tack-sharp
- **Softness where it serves:** Backgrounds, skin texture (never over-retouched), fabric drapes
- **Consistent quality:** Every image feels like it belongs in the same world
- **Thoughtful negative space:** Room to breathe is the ultimate luxury
- **Natural imperfections:** A freckle, a wrinkle, a wood grain—these are premium, not flaws
- **Weight and substance:** Materials look real and substantial, never cheap or lightweight

Retouching Standards:

- **Skin:** Preserve texture; remove only temporary blemishes. Never smooth to plastic.
- **Eyes:** Enhance catchlights, preserve natural colour. Never change eye colour.
- **Body:** Never reshape bodies. Honour the form Allah created.
- **Clothing:** Remove lint and wrinkles only if distracting. Natural drape is beautiful.
- **Background:** Clean distractions (outlets, dust) but preserve natural texture

The Print Test: Every photograph must look as beautiful printed at A2 size as it does on a phone screen. This means:

- No over-sharpening for digital

- No crushed blacks that reveal banding in print
- Colour consistency across devices and media

16.2 AI Prompt — Premium Feel

Premium editorial photography with meticulous attention to detail, tack-sharp focus on eyes and hands,
↪ soft creamy background blur, natural skin texture preserved with no plastic smoothing, visible
↪ catchlights in eyes, natural imperfections honoured as beauty, substantial materials with weight
↪ and texture, generous negative space, consistent warm earth tone palette, A2 print quality with no
↪ banding, no over-sharpening, luxury of intention and care, premium holistic medical photography
↪ --ar 4:5 --style raw

17. COMPLETE AI PROMPTS BY CATEGORY

17.1 Portrait — Female Practitioner

Editorial portrait of female holistic practitioner, South Asian woman in her 30s wearing tailored sage
↪ green scrub top with cream long-sleeved underscrub, olive linen hijab neatly styled, gentle
↪ confident expression with soft eye contact, sitting in premium clinic interior with natural oak
↪ floors and limewash walls, warm window light creating Rembrandt pattern on face, cream leather
↪ treatment bed in soft background blur, olive tree in ceramic vessel visible, shallow depth of field
↪ f/2.8, tack-sharp eyes with warm catchlights, natural skin texture preserved, warm cream highlights
↪ and espresso shadows, muted sage and olive tones, subtle 35mm film grain, generous negative space,
↪ 4:5 aspect ratio, premium editorial medical photography, Islamic modesty, serene and authoritative
↪ --ar 4:5 --style raw

17.2 Portrait — Male Practitioner

Editorial portrait of male holistic practitioner, Arab man in his 40s with neat beard wearing cream
↪ thobe under sage green scrub top, optional espresso kufi, warm authoritative expression with gentle
↪ confidence, standing in clinic interior with walnut shelving and brass pendant light, natural window
↪ light from left creating soft modelling, amber glass jars of herbs on shelves behind, shallow depth
↪ of field f/2.8, sharp eyes with natural catchlights, warm earth tone colour grade with cream
↪ highlights and deep espresso shadows, preserved skin texture, subtle film grain, generous negative
↪ space, 4:5 aspect ratio, premium editorial medical photography, prophetic healing authority, serene
↪ and trustworthy --ar 4:5 --style raw

17.3 Treatment — Hijama (Cupping)

Editorial photograph of hijama cupping treatment, female patient in cream clinic robe and sage hijab
↪ lying face-down on cream leather treatment bed, fully draped with linens showing only upper back
↪ treatment area, female practitioner in sage scrubs and olive hijab carefully placing glass cup with
↪ brass rim on patient's back, warm natural window light from sheer linen curtains, soft focus on hands
↪ and cup with patient's serene face visible in background, natural oak floors, olive tree in ceramic
↪ vessel, walnut side table with brass pump and additional cups, warm cream and espresso colour grade,
↪ shallow depth of field f/2.8, dignified and respectful, no gratuitous blood visible, premium
↪ editorial medical photography, Islamic modesty, tranquil healing atmosphere --ar 4:5 --style raw

17.4 Treatment — Herbal Consultation

Editorial photograph of herbal medicine consultation, female practitioner in sage scrubs and cream hijab

- ↪ sitting across from female patient in cream linen robe at walnut table, practitioner gently
- ↪ explaining dried herbs in handmade ceramic bowl, warm natural light from arched window with sheer
- ↪ curtains, brass balance scale and amber glass jars on table, open vintage medical book with gold
- ↪ calligraphy on espresso wall behind, both women making warm eye contact with expressions of trust
- ↪ and attentiveness, shallow depth of field f/2.8, warm cream highlights, muted sage and olive tones,
- ↪ subtle film grain, 4:5 aspect ratio, premium editorial medical photography, Islamic modesty, serene
- ↪ educational atmosphere --ar 4:5 --style raw

17.5 Clinic Interior — Wide

Wide editorial interior photograph of premium holistic clinic, limewash walls in warm sand with espresso

- ↪ accent wall featuring gold Arabic calligraphy of Ayat al-Shifa, natural oak flooring with handwoven
- ↪ prayer rug in corner, cream leather treatment bed with walnut side table, olive tree in large
- ↪ handmade ceramic vessel, brass pendant lights with linen shades, open walnut shelving with amber
- ↪ glass jars of herbs and vintage medical texts, sheer linen curtains filtering golden afternoon light
- ↪ through large arched windows, marble and brass details, no plastic visible, no fluorescent lighting,
- ↪ warm earth tone palette, deep focus f/8, 16:9 aspect ratio, serene sanctuary atmosphere, Islamic
- ↪ healing space, premium editorial interior photography --ar 16:9 --style raw

17.6 Clinic Interior — Detail

Editorial detail photograph of clinic shelf arrangement, walnut floating shelf with amber glass jars of

- ↪ dried herbs with handwritten gold labels, vintage brass mortar and pestle, pressed botanical paper
- ↪ with herb illustrations, small olive wood bowl with dried rose petals, handmade ceramic vase with
- ↪ dried pampas grass, warm natural light from side creating soft shadows, shallow depth of field f/4,
- ↪ warm cream and espresso tones, muted sage accents, subtle texture in wood grain and ceramic glaze,
- ↪ premium editorial interior detail photography, prophetic medicine aesthetic, natural materials
- ↪ only, no plastic, no chrome --ar 4:5 --style raw

17.7 Product — Herbs and Ingredients

Editorial still life of prophetic medicine herbs, dried black seed (nigella sativa) in handmade ceramic

- ↪ bowl on marble surface, olive oil in amber glass bottle with linen label, honey in small brass
- ↪ vessel, dried senna leaves and sidr leaves arranged naturally, brass spoon with ground herb, warm
- ↪ natural window light from above-left creating soft shadows and highlighting texture, shallow depth
- ↪ of field f/4, warm cream and espresso colour grade, muted sage and olive tones, subtle film grain,
- ↪ premium editorial product photography, Islamic healing ingredients, natural materials, no plastic,
- ↪ contemplative and reverent mood --ar 4:5 --style raw

17.8 Product — Cupping Set

Editorial product photograph of premium hijama cupping set, glass cups with brass rims artfully arranged
↳ on walnut tray with cream linen cloth, brass manual pump with leather seal and patina, small marble
↳ mortar with ground herbs, dried olive branch as prop, warm natural light from above creating soft
↳ reflections in glass and brass, shallow depth of field f/2.8, tack-sharp on brass rim details, warm
↳ cream highlights and deep espresso shadows, muted sage accents, subtle film grain, premium editorial
↳ product photography, Islamic healing instruments, luxury of intention, no plastic visible --ar 4:5
↳ --style raw

17.9 Patient — Diverse Representation (African Woman)

Editorial portrait of African woman in her 50s as patient in holistic clinic, wearing cream clinic robe
↳ and soft sage hijab, serene expression of trust and gentle hope, sitting on cream leather treatment
↳ bed, warm natural window light creating soft golden glow on skin, natural oak floors and olive tree
↳ in background, practitioner hands visible preparing herbal remedy in brass bowl, shallow depth of
↳ field f/2.8, tack-sharp eyes with warm catchlights, rich skin tones preserved in warm neutrality, no
↳ orange oversaturation, cream and espresso colour grade, subtle film grain, 4:5 aspect ratio, premium
↳ editorial medical photography, dignified and respectful, Islamic healing space --ar 4:5 --style raw

17.10 Patient — Diverse Representation (Southeast Asian Man)

Editorial portrait of Southeast Asian man in his 60s as patient in holistic clinic, wearing cream linen
↳ clinic robe over modest clothing, neat grey beard, peaceful expression with eyes closed in serene
↳ trust, sitting in walnut chair with hands gently resting on knees, warm natural window light from
↳ arched window creating soft modelling, brass pendant light and amber glass jars visible in soft
↳ background, shallow depth of field f/2.8, natural skin texture with dignified ageing preserved, warm
↳ cream highlights and espresso shadows, muted olive and sage tones, subtle film grain, 4:5 aspect
↳ ratio, premium editorial medical photography, Islamic healing space, quiet authority of age --ar 4:5
↳ --style raw

17.11 Hands — Treatment Detail

Editorial close-up of hands performing healing treatment, female practitioner's hands in sage scrubs
↳ gently holding glass cupping cup with brass rim against patient's back, patient draped in cream
↳ linen, warm natural light from window creating soft shadows highlighting hand texture and cup
↳ transparency, shallow depth of field f/2.8, tack-sharp on cup rim and fingertips, warm cream and
↳ espresso tones, muted sage accents, no jewellery visible on hands, clean natural nails, premium
↳ editorial detail photography, Islamic modesty, precision and gentleness, prophetic healing
↳ tradition --ar 4:5 --style raw

17.12 Hands — Herbal Preparation

Editorial close-up of hands preparing prophetic medicine, male practitioner's hands grinding black seed
↳ in marble mortar with brass pestle, dried herbs scattered naturally on marble surface, brass spoon
↳ with ground herb, warm natural window light from above creating soft shadows and highlighting stone
↳ texture, shallow depth of field f/2.8, tack-sharp on hands and mortar, warm cream and espresso
↳ colour grade, muted sage and olive tones, visible hand texture and natural imperfections, no
↳ jewellery, clean nails, premium editorial detail photography, prophetic medicine preparation,
↳ natural materials, contemplative reverence --ar 4:5 --style raw

17.13 Community — Group Wellness

Editorial photograph of community wellness gathering, diverse group of women in modest earth-toned clothing and hijabs sitting in circle on handwoven rugs in clinic community room, warm natural light from large arched windows, olive tree in centre of circle, brass lanterns and ceramic vessels, one woman in sage scrubs leading discussion with open book, expressions of gentle attentiveness and community warmth, no exaggerated happiness, quiet joy and sisterhood, shallow depth of field f/4, warm cream highlights and espresso shadows, muted sage and olive tones, subtle film grain, 16:9 aspect ratio, premium editorial photography, Islamic community space, sakina atmosphere --ar 16:9 --style raw

18. PHOTOGRAPHY PRODUCTION CHECKLIST

Pre-Shoot

- Location scouted for natural light quality and time of day
- All wardrobe pressed and ready in Sunnah Palette
- Props and materials sourced (no plastic, all natural)
- Calligraphy and artwork positioned
- Plants watered and positioned for optimal framing
- Equipment cleaned and styled (brass polished to natural patina, not mirror finish)
- Patient consent forms signed with specific usage rights
- Modesty guidelines reviewed with all talent

During Shoot

- Light meter readings taken at key positions
- Colour temperature checked and locked (3200K–4000K)
- Test shots reviewed for focus, exposure, and colour
- Modesty compliance verified before each frame
- Dignity and comfort of patients prioritised over “the shot”
- Multiple angles captured for each setup
- Detail shots captured for every scene (hands, materials, textures)

Post-Production

- Colour grading applied using Sunnah Palette specs
- Skin tones checked across all ethnicities in batch
- Modesty compliance double-checked in all frames
- Retouching applied with restraint (preserve texture, remove only temporary blemishes)

- Sharpening optimised for intended output (web vs. print)
 - Final images reviewed against Trust, Excellence, Tranquillity criteria
 - Images exported in correct aspect ratios for all platforms
-

19. THE FINAL COVENANT

Every photograph is a witness.

When a prospective patient sees a Sunnah Remedies photograph, they must feel:

- *“This is a place where I will be safe.”*
- *“These people know what they are doing.”*
- *“I can breathe here.”*

If a photograph does not evoke these three feelings, it does not belong in the Sunnah Remedies visual library.

This is not marketing. This is *da’wah* through imagery—an invitation to experience healing that honours the prophetic tradition while embracing the highest standards of contemporary excellence.

Photograph with *tawakkul*. Grade with *ihsan*. Compose with *sakina*.
